

PROFILE® ASSET MANAGEMENT SYSTEM

The ProFile Asset Management System is a comprehensive solution for tracking assets. The cloud-based system organizes assets and stores related documents and photos, while also logging GPS locations.

Several options of Asset Tags and Plates are offered on the following page.

- Different asset types require different types of data. ProFile offers five asset classes (molds, dies, machines, equipment, and inserts) with customizable asset types under each class. There are also several user-defined fields to give users increased flexibility.
- Each asset page includes a filing cabinet to store critical documents associated with that asset. These documents can be easily accessed and shared by users with permissions. Users have 10GB of storage associated with their asset database.
- When logging in to ProFile via ProFile-System.com, the dashboard shows a breakdown of assets in the system by asset class. Clicking on any of the asset classes on the chart will drill down to the detailed listing. Also, the dashboard shows Preventive Maintenance status of assets for easy access to overdue PMs.
- See a complete list of all assets in one place or choose the tab for the asset class filter. All fields on the tool listing are sortable using the header fields.

Asset ID	Asset Image	Upcoming PM	Last GPS Scan	Last Price	Current Price	Part Number	Part Name	Action
4077728			1/19/2023, 11:47:03 PM	PL-PR553.01		1.826	Wheel	Switch
4078005			2/3/2022, 10:40:41 AM	PL-PR553.01	1.9927		Cover Plate	Switch

Mobile Functionality and GPS

- Scan the QR code on the Asset Tags or Plates on your mobile device to see a summary view of the asset. To see additional data, press the Details button. Every time a QR code is scanned, the GPS location is pushed to the cloud and recorded on the asset page.
- Preventive Maintenance and Work Orders can be scheduled.
- Users can create checklists and assign them to assets to view how many cycles or the date assets require maintenance. To schedule maintenance or other activities, Work Orders can be utilized to track unscheduled maintenance and repairs for assets.
- The ProFile Asset Management system can be used with both CounterView and CVE Monitoring devices via their unique serial number.
- For a demonstration or to set up an account for ProFile system access, contact SystemMonitoring@procomps.com.
