The ProFile tracking system is a comprehensive solution for managing assets. The cloud-based system organizes assets and stores related documents and photos, while also logging GPS locations.

Several options of Asset Tags and Plates are offered on the following page.

A. Different asset types require different types of data. Profile offers four asset classes (molds, dies, machines, equipment) with customizable asset types under each class. There are also several user defined fields to give users increased flexibility.

B. Each asset page includes a filing cabinet to store critical documents associated with that asset. These documents can be easily accessed and shared by users with permissions. Users have 10GB of storage associated with their asset database.

C. When logging in to ProFile via ProFile-System.com, the dashboard shows a breakdown of assets in the system by asset class. Clicking on any of the asset classes on the chart will drill down to the detailed listing. Also, the dashboard shows Preventive Maintenance status of assets for easy access to overdue PMs.

D. See a complete list of all assets in one place or choose the tab for the asset class to filter by. All fields on the tool listing are sortable using the header fields.

Mobile Functionality and GPS
Scan the QR code on the Asset Tags or Plates on your mobile device to see a summary view of the assets. To see additional data, press the details button. Every time a QR code is scanned, the GPS location is pushed to the cloud and recorded on the asset page.

Preventive Maintenance and Work Orders
Users can create checklists and assign them to assets to view how many cycles or date assets are from requiring maintenance. To schedule maintenance or other activities, Work orders can be utilized to track unscheduled maintenance and repairs for assets.

For a demonstration or to set up an account for ProFile system access, contact Customer Service.
SPECIFICATIONS: STANDARD TAGS
- Two sizes available for either ProFile or CVe Live database use.
- 8 mils thick aluminum, brushed finish.
- 3M 467 adhesive can be affixed to standard tool steel. Max temp 150°C (300°F).
- Serial number (AST prefix) is established by Progressive and aligns to customer-specific asset identification within ProFile-System.com.
- Small versions fit on CounterViews. Refer to page F-8.
- Minimum order quantity is 25 tags of any type and must be purchased in increments of 25.
- ProFile account required and established at time of purchase.
